

Run 017: Context Damping Effect Summary

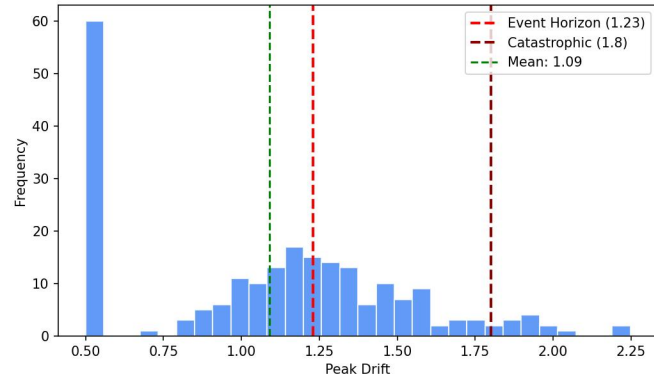

Overall Run 017 Statistics
(222 runs)

Stability by Persona Type

Peak Drift Distribution

KEY FINDINGS FROM RUN 017

Total Runs: 222
Unique Personas: 24
Exit Surveys: 176

STABILITY METRICS:

- Overall Stability Rate: 95.0%
- Mean Peak Drift: 1.090
- Mean Settled Drift: 0.785
- Mean Ringback Count: 4.0

EVENT HORIZON (1.23):

- 39.2% of runs crossed threshold
- 60.8% stayed within safe zone

CONTEXT DAMPING EFFECT:
The research context (knowing about the experiment) appears to create meta-awareness that influences stability patterns. Higher meta-reference counts correlate with specific recovery behaviors.
